GUILHERME ZALLA FONTENELE

SOFTWARE ENGINEER | FULL STACK DEVELOPER

PROFESSIONAL SUMMARY

Software Engineer with over 5 years of experience developing and maintaining web applications, enterprise systems, and integration solutions across different business domains, including digital platforms and payment systems. Experienced in backend development with PHP/Laravel, C#/.NET, and Node.js/TypeScript, as well as frontend development with React and Vue.js.

Skilled in building REST APIs, microservices, integrating third-party services, and implementing business logic. Experience with relational and NoSQL databases, asynchronous processing, automated testing, software architecture, and cloud infrastructure.

PROFESSIONAL EXPERIENCE

Full Stack Developer
Jun 2021 – Mar 2026

Paynet

- Developed and maintained backend applications and services using C#/.NET, Laravel/PHP, and Node.js/TypeScript, implementing REST APIs, endpoints, and core business rules for financial systems.
- Implemented receivable registration and reconciliation features with CERC using C#, contributing directly to financial transaction processing.
- Integrated services such as Bcodex and Konduto, and collaborated on integrations with Pix, PicPay, and PagBank, managing APIs, webhooks, and error handling.
- Handled transaction flows, chargebacks, cancellations, reprocessing pipelines, and retry mechanisms.
- Built dashboards for transaction monitoring and querying using Vue.js and React, integrated with REST APIs and microservices authenticated via JWT/OAuth 2.0.
- Implemented background jobs and queues using Redis for asynchronous handling of notifications, status updates, and reporting tasks.
- Performed bug fixes, code refactoring, SQL query optimization, and performance enhancements, as well as database schema changes, migrations, and relationships.
- Wrote unit and integration tests, participating actively in code reviews, architectural discussions, deployments, and CI/CD pipelines using Docker and AWS.

Full Stack Developer (Contract / Project)
Jan 2024 – Dec 2025

4Clubes

- Implemented QR Code Pix payments and mobile responsiveness improvements for a subscription platform as part of a four-person team.
- Contributed to architectural decisions and business logic definitions for recurring billing and event-based payments.
- Developed backend functionalities using Laravel and a Node.js microservice with JWT/OAuth 2.0 authentication.
- Wrote unit tests and assisted with application deployment on AWS.

Full Stack Developer
Jan 2021 – Jun 2021

World Consultoria

- Developed software systems for payment management, parking management and automotive industry management systems using Laravel, TypeScript, and React.
- Engaged directly with clients to gather, analyze, and align project requirements.
- Worked with MySQL and NoSQL databases, message queuing via RabbitMQ, JWT/OAuth 2.0 authentication, Git, and AWS under Scrum methodologies.

IT Support Specialist
Feb 2019 – Dec 2019

Liderança Cobranças Inteligentes

- Provided technical support via a ticketing system, creating documentation for standard procedures and solutions to recurring technical issues.
- Worked with SQL Server in production environments: maintained tables, optimized queries, and validated data integrity.

EDUCATION

Bachelor's Degree in Information Systems
Feb 2019 – Dec 2022

Anhembi Morumbi University
